➤ RASA, Khabarovsk, Russia

Employment period: June 2023 yr. - December 2024 yr. (1 year 6 months)

Position: PHP (Bitrix) Developer

Responsibilities:

- Developed and maintained corporate websites and online stores on the 1C-Bitrix platform
- Managed the Bitrix admin panel, including creating and customizing sections, info blocks, and forms
- Integrated e-commerce, payment, and delivery modules to support online store functionality
- Performed basic customization using PHP, HTML, CSS, and JavaScript, including simple components and layout adjustments
- Configured data exchange between websites and 1C Enterprise systems
- Provided ongoing technical support for clients and collaborated effectively with designers, managers, and cross-functional team members

➤ Duos Digital Studio — Remote

Employment period: May 2022 yr. - December 2022 yr. (7 months)

Position: Junior Web Developer

Responsibilities:

- Developed and customized WordPress websites, including landing pages, blogs, and corporate sites
- Implemented basic PHP, HTML, CSS, and JavaScript adjustments to improve site functionality and presentation
- Resolved front-end and back-end issues through targeted code fixes across WordPress environments
- Optimized website structure and content for SEO to support improved search visibility
- Delivered website enhancements aligned with client and project requirements within a digital studio environment

➤ Freelance

Employment period: January 2022 yr. - May 2022 yr. (4 months)

Position: Web Developer

Responsibilities:

- Learned front-end layout through self-study using free courses and YouTube resources
- Built first landing pages while developing practical skills in HTML, CSS, and JavaScript
- Explored responsive design principles and cross-browser compatibility to improve usability across devices and platforms
- Started freelancing and completed first client orders for landing page layout
- Clarified project requirements directly with clients to align deliverables with expectations

- Delivered freelance projects on time while maintaining a professional and reliable client experience

EDUCATION

➤ Khabarovsk State Academy of Economics and Law

Faculty: Faculty of International Economic Relations

Specialty: International commerce

Graduation date: 2015 year

Study mode: Full-time

COURSES & TRAININGS

➤ React 2026 Q2

Organization: The Rolling Scopes School

Duration: 3 months

2026 yr.

Achievements:

- Completed an intensive 3-month curriculum at The Rolling Scopes School with a strong focus on practical application and real-world development workflows.
- Explored React, Next.js, and adjacent ecosystem tools, including state management, client/server components, and routing.
- Built a final team project in a 3-member group: Swagger-Editor-App, a full-featured visual OpenAPI/Swagger specification editor combined with a REST client.
- Deployed the final project to Netlify for production-like testing and demonstration.
- Collaborated closely with teammates to distribute tasks, conduct code reviews, and deliver the project on time.
- Participated in regular code review sessions and passed a final one-on-one technical interview with a mentor, including live coding and in-depth questions on React and Next.js.

➤ JS/FE 2025 Q3 (JAVASCRIPT)

Organization: The Rolling Scopes School

Duration: 5 months

2026 yr.

Achievements:

- Studied pre-recorded webinars and recommended reading materials to build a strong foundation in core JavaScript concepts.
- Completed practical coding assignments under strict deadlines, applying theoretical knowledge to real-world programming problems.
- Attended weekly live Q&A sessions to clarify complex topics and deepen understanding through direct mentor feedback.
- Collaborated with peers in study groups to debug code and solve algorithmic challenges in a cooperative learning environment.
- Progressed through 3 sequential stages of the program, meeting defined topic and advancement requirements at each checkpoint.
- Contributed to a 6-week team project with 5 people, helping build a full interview preparation simulator using TypeScript and React.
- Passed 3 one-on-one mentor interview sessions featuring live coding challenges and theory reviews as stage completion checkpoints.
